

Strong partnership delivers proven results for Silverline

A partnership between Fielders and Silverline Steel Constructions is making good on their promise of “strong partners, proven results.”

Silverline was established to provide the building industry with a premium cold Rollformed shed structure. Its Endurance sheds & structures division is based at Regency Park Manufacturing site and the fabrication/kitting area is located in a recently built factory extension, purpose built to grow the steel structures division.

Silverline manager Jason Bais says, “We recognised an opportunity to service medium sized commercial projects as most contractors position themselves in the domestic or heavy industrial markets. We have the ability to provide a functional and affordable premium product.”

Silverline provides full service and customers don't need to worry about planning & building documentation and installation. Silverline provides roof plumbing, steel erection and shed building. Trade services include roofing & guttering, sheds & garages, patios, carports & verandahs, rural & industrial buildings.

Silverline is a preferred contractor of Fielders Steel Roofing and a certified distributor of the Fielders Endurance sheds & structures.

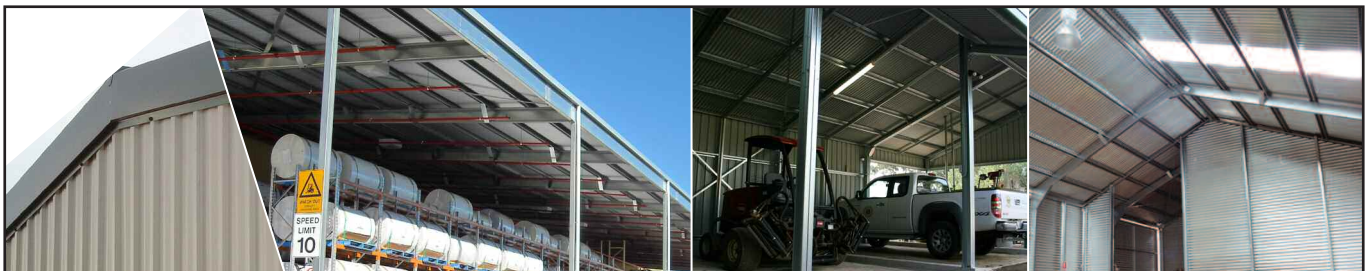

Fielders Steel Roofing National Manager - Steel Structures, Nathan Jack, says, “Our partnership with Silverline allows us to recommend Silverline for the complete supply and install package when we approach architects, engineers and developers to discuss steel structures in our product range. Silverline have extensive experience and capability in the erection of commercial and custom steel structures. Our experience with Silverline shows they consistently demonstrate a professional approach to achieving the best building solution and finished product to the customer. Silverline designs are based on a portal frame structure with pre

- punched holes and heavy duty triangular ridge and knee plate connections to add strength and stability, eliminating flex and sag. Customers have the security of Australia's most trusted brands – Fielders Steel Roofing, BlueScope Steel and Colorbond®. Products have structural guarantees and material warranties while a superior software designs system combines custom flexible options in 3-D designs. Size, layout, appearance and colour options are flexible. Engineer's verified and accredited compliance certificates are provided as required by councils.

Jason says, “We pride ourselves on a high standard of service and workmanship and our ability to offer custom design and construction advice.”

Silverline has successfully completed the following projects: Willunga community bus depot for McMahon Services on behalf of Onkaparinga Council, custom built horizontally clad shed for Scott Salisbury Homes, boat shed for the SA Sea Rescue Squadron (pictured), washbay for Glen Osmond Golf Club, truckwash for Adelaide Fuel, chemical shed for Programmed Maintenance for the Flinders University biology campus, pool enclosure for the South Australian Research and Development Institute (SARDI).

SILVERLINE CONSTRUCTIONS STRONG PARTNERS, PROVEN RESULTS.
